

I'm working as professional studio musician and have my own studio with huge collection of ethnic and traditional instruments (over 200). This include [various ethnic and traditional strings, winds and percussion](#) . If you need to enrich your CD or film music production with an advanced solo on any of my instruments, please **contact me** [info \(at\) nadishana \(dot\) com](mailto:info@nadishana.com) .

The best thing is: you're hiring multi-instrumentalist, so you can make your complete track just in one place: percussion, bass line, chords on one of my strings, solo on one of my wind instruments.

If you need an advanced arrangement, sampling work, soundscapes, ambient textures or professional mixing for your soundtracks, just drop me a line.

You can listen and see examples of my work below and on my [instrumen ts' _p _a _ge](#) See the references and examples of my work with different musicians [here](#) Working process can be done through the internet by exchange audio files but I can work in your own studio as well, I like to meet new interesting people.
